## **Risk Management in Public Health Procurement and Supply Chains**

**Duration:** 2 months online course

**Course fees:** USD 400 (exclusive of taxes and bank charges)

Special price for group enrollments

*This course is targeted at health professionals in public health programs (development partners, government, NGOs, civil society, academia) and people interested to know how to successfully handle risk in the entire PSM cycle.*

### **Course Overview**

This course provides participants with an understanding of using a risk management approach, the categorization of the key risk factors and how they can be mitigated.

It encompasses development of an understanding of vulnerable populations, morbidity and mortality patterns and aligning such needs with product selection and quantification.

It includes reviewing existing PSM policies, strategies and processes that blend humanitarian and health supply chain functions. It seeks to share experiences and success stories via peer-to-peer learning with delegates from different countries and organizations.

This course is designed to prepare aspirants for a role that deals extensively with the challenges in healthcare systems.

### **Course Contents**
